17 BURGERS	19.85
20 LUNCHTIME MENU	8.45

- Connect with different terminal models - e.g. Have touch screens in one branch, pads in another
- Choose which files to share, and which to keep separate - e.g. Share the keyboard file, but use a different clerk & PLU file.
- Schedule for timed polling
- Full journal break down - search by date
- Web based software means no installation on customer's computer is required, no updates to worry about - your customer is always using the latest version!
