

TOUCH SCREEN POS SYSTEM FOR ANY TYPE OF BUSINESS.

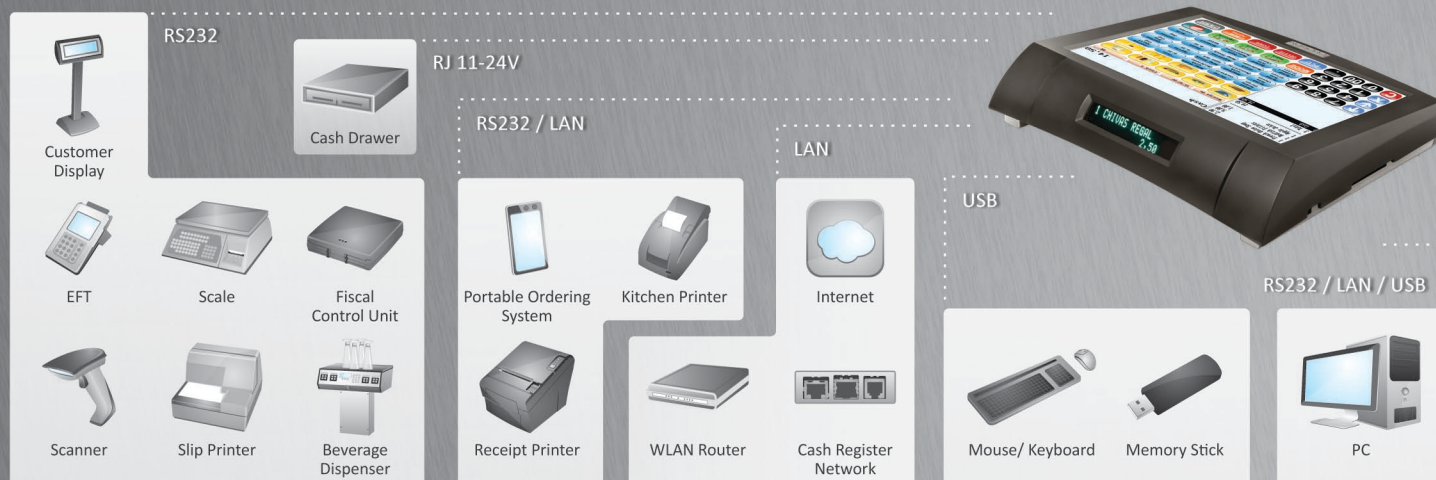

The QUORION QTouch 12 is an embedded POS system that impresses with a sleek and compact design for discreet placement in any type of business. Yet, it convinces with its sturdy construction, low cost of ownership, and magnificent performance under heavy-duty use. As opposed to a PC based solution there are no noisy fans. In addition, the QTouch 12 comes with POS software pre-installed and therefore requires no additional investments. Software and hardware function seamlessly as a single entity.

Managers in the food service industry will especially appreciate the graphical touch screen, because it unlocks new possibilities to cleverly manage your restaurant. Take advantage of an user interface, which offers table layouts, menu structures, and button customization. For retailers, on the other hand, the QTouch 12 supplies a complete retail management system with highlights such as 55,000 PLUs, scanning, and stock control. You can also program up to 99 variations of multi-buy action tables and thereby offer special discounts with repeat purchases to your clients. Furthermore, the LED backlit 12" color touch screen accelerates through-put and minimizes entry errors. Trainees in turn benefit from the user friendly touch navigation, which leads them through the order process via the presentation of available options.

The QTouch 12 incorporates touch screen technology with a customer display and clerk lock to become your one-source hardware solution. The design and functional characteristics lower your costs, enhance productivity, and ultimately increase customer satisfaction through faster processing times.
